

# Silent Capturing

Advanced Scripting Series

---

March 24, 2021

# Agenda

---

- Introduction
- Overview
- Scenario Examples
- Summary

# Introduction

---

## Why to use the Silent capture mechanism?

- Enables you to back-check that the respondent answers are matching the survey data.
- Enables you to capture Photo/Video/Audio without notifying the interviewer.

## Please Note:

- The Audio/Photo/Video is automatically attached to the interview and is available in the [Operation console](#).

# Overview

---

We will focus on

- Enable Basic configuration of Silent capture.
- Configure recording consent question.
- Randomization – Use scripting to randomly record questions.
- Naming – Use a Call-back function to name the collected recording as you would like.
